Sage Timberline Office

Your Update! For Construction
and Real Estate**Interested in expanding the range of job types you do while still improving your bid-to-win ratio?**

Learn about several new, powerful and industry specific Advanced Assembly Databases. Each database includes current pricing, requires little or no setup, and can be used right "out-of-the-box".

Sage Construction and Real Estate recently introduced a new suite of Advanced Assembly Databases that are so robust, your estimators can start reaping the benefits right away. These new databases contain a complete range of items, sophisticated assemblies, and current industry pricing. Versions include:

- Commercial
- Residential
- Concrete/Masonry
- Sitework

In addition, the suite offers a Composite database that includes all of the data from the above databases, ensuring you have everything needed to complete your estimate. A smaller version of the Composite database, the Starter Advanced Assembly Database, is perfect for those with less extensive requirements.

If you feel your Estimating* system could be improved or your company is missing opportunities to bid more work, now is the time to look at these new databases.

Advanced Database Assemblies

If you are interested in learning more about the new database offerings, please contact your business partner. You can also [download the Advanced Assembly Composite Database Information sheet](#).

We are pleased to offer tools to extend your competitive edge in these challenging times.
